CSCI 350 Project cover page   Team name: <u>FBI</u>

Our team, whose signatures appear below, completed this project as a group effort. By our signatures, we indicate that we agree that each of us has made the following contributions. (Given our virtual environment, I suggest that one of you enters all the text, turns this form into pdf, and circulates it for signature.) Do it now, before you forget.

Member 1 (enter your contributions here and then both print and sign your name)

Rinchen Lama

- Baseline 2
- Experimental Evaluation
- Collaborated on final player
    - implemented update and its helper functions on Python (improved by Chen)
    - Worked on advance_fix() (incomplete)

_____

Member 2 (enter your contributions here and then both print and sign your name)

Chen Stanilovsky

- Baseline 1
- Implemented an algorithm inspired by Rao's
    - Converted pseudocode and helper function descriptions into running python3 code
- Finalized the project report with LaTeX

_____

Member 3 (enter your contributions here and then both print and sign your name)

Michelle Lucero

- Baseline 3
- Final edits to our tournament player
    - Using sets instead of lists to decrease computation time
    - Deleted lines of code that were unnecessary
    - Provided cleaner version for final tournament player
